**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

As a VERY happy customer of Sonic Fiber Internet, it is absolutely necessary to allow competition in telecom markets. After using broadband from both AT&T and Xfinity in the past, their domination of the telecom market has caused their customer service to decline dramatically and their services remain inferior while they continue to increase their prices.

In 2019 and the future, broadband remains a critical part of the typical American home, as my children use it for school, my wife uses it for work, and the majority of entertainment requires it. To be limited to only 2 providers for this critical service would not only be unfair, but it would be 100% anti-American. This country thrives on competition, and the corrupt will always attempt to ensure an even playing field is prevented, which is why it is so important to fight for.

The FCC has the ability to prevent the telecom giants from dominating 100% of the market, but sadly it is no longer a duty of common sense, it is a struggle between submitting to the will and the money of those giants with anti-American ideals, and those fighting for even competition.

I can only hope that you care enough about your country to make the correct decision.

Vincent Salinas
